

CURBSIDE VOTING

What is it and how does it work?

- Any voter unable to enter the polling place may request to vote using curbside voting. This request may be made by any person on behalf of the voter, so long as the voter is present outside of the polling place and verifies that they made the request.
- Curbside voting must be carried out by two election personnel of different political party preferences. Curbside voting often, but not always, involves a voter who cannot leave their car to enter the polling location. However, any voter can request to use curbside voting by contacting the **Clerk's Office at (734) 466-2230**.
- Two election personnel from our office will bring the voter an Application to Vote. Once completed and the voter identification requirement has been met, the election personnel will re-enter the polling place, process the voter's Application, and issue a ballot to the voter.
- The election personnel will then take the ballot, a secrecy sleeve, and the completed Application to the voter. The election personnel will wait for the voter to complete the ballot at a distance to provide privacy and to allow the voter to return the voted ballot in the secrecy sleeve.
- The election personnel will retrieve the completed ballot and application from the voter, verify that the number printed on the ballot stub (if printed ballots) matches the ballot number printed on the Application, and place the ballot into the tabulator inside the polling location.
- Finally, the election inspectors return to the voter to notify them that their ballot has been accepted by the tabulator.
